

# LTT Alden Biesen (BE), 18. October – 20. October 2023

## Day 1 – Wednesday, October 18

LTT participants arrived at Alden Biesen and were welcomed before diving into the first training session, focused on refreshing knowledge of AR, sharing experiences, and troubleshooting challenges.

Afterward, the group explored the natural surroundings of Alden Biesen, combining relaxation with informal discussions. The day concluded with dinner and free time, allowing participants to network in a more informal setting.

---

## Day 2 – Thursday, October 19

The day began with a session on the e-course, where participants engaged in both theoretical and practical discussions. The focus was on refining the content and ensuring its applicability in various educational contexts.

After a lunch break, participants took part in a surprise activity, designed to foster engagement and collaboration. In the castle of Alden Biesen they were invited to solve the mystery...

In the afternoon, the focus shifted to the survey and a demonstration of the guides, ensuring that all participants understood how to apply the survey results in their own contexts.

The evening ended with dinner and free time.

---

## Day 3 – Friday, October 20

The final day began with a visit to Provinciale Secundaire School Diepenbeek, where participants explored its educational infrastructure and methodologies.

Following this, a final evaluation session took place, where participants reflected on their learnings and discussed how to implement insights from the training in their respective institutions.

The LTT concluded with a farewell lunch and certificate ceremony, marking the successful completion of the training.

---

## Conclusion

The LTT in Belgium provided valuable hands-on experience in AR and e-learning applications, fostering collaboration and exchange of best practices. Participants left with a deeper understanding of how to implement these technologies in their schools.

The next steps involve applying the lessons learned, finalizing the e-course, and preparing for the next project phases.
